

We've Come A Long Way Since 1953

The Nichols family started in the purebred business when I bought my first purebred Angus 4-H heifer at age 13.

We've always been the leader in new technology— Performance testing (1956) - Certified Meat Sires (1961) - Expected Progeny Differences EPDs (1977) - Ultra-sound (1989) - Carcass Merit DNA Validation (1998) and DNA genomic profiles (2005).

The cattle we sell are free of the genetic abnormalities, PHA, THA, AM, MI, CA and DD by pedigree or DNA test (2013)

Bell Boys Heir (1961)
Certified Meat Sire #141

Black Diamond (1976)
