## GLOSSARY OF ITEMS ON NICHOLS BULLS

**Breed:** Angus, Simmental, SX and DX Composites.

**Brand/Tag:** Ear Tag, Brand, Tattoo & Name are the same.

**Color:** B—Black, BWF—Black-baldy, (may have other white)

**Horn/Poll:** P — Smooth Polled S — Polled with scurs

**Birth Date:** Birthday of animal.

**Birth Wt.:** Actual birth weight.

**205 Adj:** Weaning weight adjusted to 205 days of age

**205 Ratio:** An within-herd index of a calf's weaning weight

**Cum ADG:** Average Daily Gain for the entire feedlot test period computed from actual weaning weight to yearling weight

**EPDs:** Expected Progeny Differences are estimates based on the data of the individual animal and his relatives in all the different herds across the breed's population. EPD's figures are in actual pounds, plus (+) or minus (-) for each trait. Those below would be minus (-) and those above average would be plus (+). You can expect these differences in the actual weight of your bull's calves. EPDs predict the transmitting ability of each bull when compared with the many thousands of bulls in each breed.

**EPD Note:** Nichols Angus are on an Angus Base. Nichols Simmentals, South Devon and all Composite are on the Simmental base.

**Color:** hom is homozygous black, het is heterozygous red carrier

**Carcass EPDs:** Marbling: Intramuscular fat in the rib eye determines USDA quality grade. Prime, CAB, Choice, or Select BF: Back fat thickness in inches measured on the rib eye.

**REA:** Rib eye area in square inches measured at the 13th rib.

**Calving Ease:** Suitable to breed "heifers" or "cows".

**Feed Efficiency Index:** (at the top of each data box): SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. As the data is gathered we have added three points of information on these Bulls.

Feed Efficiency Information three points of information on each bull.

1. ADG EPD is difference between animal actual ADG and expected ADG based on size and growth of an animal on a feed test.
2. RFI EPD is the difference between an animal's actual intake and expected intake based on size and growth of an animal on a feed test.
3. NEI (Nichols Efficiency Index) - \$ Index combining both Adg and Feed conversion for economic gain.

**Nichols Health Shield:** The Bulls represented with the Nichols Health Shield Emblem represent bulls that are in the Top 30% of Nichols Genetic Evaluation for resistance to Bovine Respiratory Disease. The probability (in %) of a calf not being treated for respiratory disease post weaning.

## Feed Efficiency EPDs

SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. As the data is gathered we have added three points of information on these Bulls.

### Feed Efficiency Information three points of information on each bull.

1. ADG EPD is difference between animal actual ADG and expected ADG based on size and growth of an animal on a feed test.
2. RFI EPD is the difference between an animal's actual intake and expected intake based on size and growth of an animal on a feed test.
3. NEI (Nichols Efficiency Index) - \$ Index combining both Adg and Feed conversion for economic gain.

# DVAuction

Broadcasting Real-Time Auctions

- ✓ **Volume discounts**
- ✓ **Health & Death Warranty (limited)**
- ✓ **\$100 off if you pick up your Bull(s)**
- ✓ **Free of Genetic Abnormalities— AM, NH, MI, CA, DD, MI, TH, and PH by pedigree or DNA test**

### Sale Terms and Conditions

Nichols will retain a 25% semen share interest in every bull that is for sale today.

Bulls will be semen checked prior to pick up or delivery. Nichols Farms offers death and loss of use warranty on their sale bulls. This warranty must be purchased at time of sale. Bulls are guaranteed to service cows. Any bull that settles healthy cows by natural service or passes a fertility test made by a certified veterinarian mutually agreed upon by Nichols Farms and buyer shall be considered a breeder.

- Injury or disease to the animal occurring after the sale.
- Animals put in service or bred at less than 12 months of age.

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

## Feed Efficiency EPDs

SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. As the data is gathered we have added three points of information on these Bulls.

### Feed Efficiency Information three points of information on each bull.

1. ADG EPD is difference between animal actual ADG and expected ADG based on size and growth of an animal on a feed test.
2. RFI EPD is the difference between an animal's actual intake and expected intake based on size and growth of an animal on a feed test.
3. NEI (Nichols Efficiency Index) - \$ Index combining both Adg and Feed conversion for economic gain.

## Top Ten Reasons to Buy a Nichols Bull

1. Maximize heterosis to take your calf crop and cows to next level.
2. Early adopter (1987) of ultra-sound and genomic profiles.
3. Can't attend? Take advantage of our sight-un seen guarantee.
4. We will notify our network of feedlots when you sell your calves.
5. Whether buyers or sellers we will help you buy or sell Nichols sired bred heifers or heifer calves at no cost to either buyer or seller.
6. Buy sons from the same hard working cows that have had 40 AI sires the past 60 years.
7. Health, Loss of use and Death Warranty available.
8. Volume discount and free delivery in continental United States.
9. \$100 discount if you pick up and pay for your bulls - WHEN YOU ARE READY for them.
10. For 70 years we've been open every day except Sunday

**Nichols Hybrids and Composites** are the result of crossing two or more pure lines in specific crosses to maximize the best traits of the grandparent lines. All Nichols lines are black and polled.

A Composite bull's heterosis (cross bred vigor) is transmitted to his offspring. Plus, his calves are more uniform in type, performance, and carcass characteristics than back crossing purebreds.

Virtually all poultry, swine, and grain genetics are the result of systematic composite breeding.

---

## Feed Efficiency EPDs

SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. As the data is gathered we have added three points of information on these Bulls.

### Feed Efficiency Information three points of information on each bull.

1. ADG EPD is difference between animal actual ADG and expected ADG based on size and growth of an animal on a feed test.
2. RFI EPD is the difference between an animal's actual intake and expected intake based on size and growth of an animal on a feed test.
3. NEI (Nichols Efficiency Index) - \$ Index combining both Adg and Feed conversion for economic gain.
